STATISTICAL ANNEX

The Statistical Annex was prepared by ICF, the European Migration Network Service Provider, with statistics provided by Eurostat. It provides an overview of the latest available statistics for Latvia on aspects of migration and international protection (2018-2021), including legal residence, asylum, unaccompanied minors, integration, irregular migration, return and visas. Where statistics were not available at the time of publication, this is indicated in the Annex as “N/A”.

STATISTICAL ANNEX

! GENERAL NOTES

This statistical annex complements the Country Factsheet with relevant migration-related data organised in up to nine thematic sections – depending on data availability. The dashboard-like layout of the annex allows comparability across countries as well as simultaneous visualisation of different indicators. Whenever data are not available, the relative chart is indicated with 'N/A'. Data are provided for the latest available year or the latest available four-year period. For some indicators, data are rounded in the source. The sum of percentages or of individual values might not add up to 100 or to the total value. This is due to rounding and confidence intervals in the original data. For this edition, figures for Third Country Nationals refer to 'non-EU27 nor reporting country' across all indicators and years. The How to Read Guide is available [here](#).
